

## SOME DES TO SOLVE

You know how to solve first-order *separable* (section 2.2) and *linear* (section 2.3) DEs. Decide if these are separable or linear (or both or neither), and find the general solution if possible.

1.  $\frac{dy}{dx} = 1 + x^2$

2.  $\frac{dy}{dx} = 1 + y^2$

3.  $\frac{dy}{dx} = 1 + y$

4.  $\frac{dy}{dx} = 1 + xy$

5.  $\frac{dy}{dx} = 1 + xy^2$

6.  $\frac{dy}{dx} = x + xy$
